PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience designing, building, and optimizing enterprise-scale web applications using Angular, React.js, and TypeScript. Proven track record delivering a mission-critical payment module end-to-end for a Central Government (Ministry of Road Transport & Highways) platform, including secure payment gateway integration, transaction verification, and REST API integration. Skilled in reactive UI architecture, performance optimization, cross-browser compatibility, and leading development teams in Agile environments. Adept at translating complex business requirements into scalable, maintainable, and high-performance frontend solutions.

TECHNICAL SKILLS

Frameworks & Libraries: Angular (v12, v14, v16, v20), React.js (v18), TypeScript, JavaScript (ES6+)

Markup & Styling: HTML5, CSS3, SCSS, Bootstrap, TailwindCSS

State Management: Redux, NgRx, RxJS

Testing: Jasmine, Karma

Tools: Docker, Docker Compose, Docker Volume, Git, GitHub, GitLab, Postman, JS Chart

CORE COMPETENCIES

Enterprise Application Development • Payment Systems & Gateway Integration • API Integration & Authentication • Performance Optimization • Team Leadership & Code Review • Agile Development • Government / Public-Sector Platforms

PROFESSIONAL EXPERIENCE

Echt Tech Consultancy Services Pvt Ltd

Sep 2025 – Present

Angular Developer | New Delhi, India

Developing the NextGen eChallan platform for the Ministry of Road Transport & Highways (MoRTH), a Central Government initiative spanning modules including Manual Challan, Grievance Redressal, Vehicle History, Challan History, Role Management, Offence Management, Mobile Device Manager, Payment, and Dashboard.

- Independently designed and built the Payment Module end-to-end, covering payment initiation, gateway integration, transaction verification, receipt generation, and payment status tracking, fully integrated with the existing eChallan ecosystem.
- Developed the Dashboard Module, delivering consolidated, data-driven views of challan and payment activity to support monitoring and decision-making.
- Implemented secure transaction flows and session management to safeguard sensitive payment data across the platform.
- Built and validated complex Reactive Forms with multi-field validation to ensure data integrity across citizen-facing workflows.
- Led a 7-person development team, driving scalable Angular architecture, conducting code reviews, and reducing development cycle time.
- Diagnosed and resolved production issues to maintain system stability and reliability for a live government platform.

Technology stack: Angular, TypeScript, RxJS, REST APIs, Docker, GitHub, HTML5, CSS3.

NetProphets Cyberworks Pvt Ltd

Sep 2023 – Aug 2025

Senior Software Engineer | New Delhi, India

- Built NICSI-ERP, an in-house enterprise resource planning system managing customer and vendor operations via NICSI, spanning multiple interrelated modules.
- Architected the migration of legacy modules to React.js, improving maintainability while preserving maximum system uptime.
- Delivered performance optimizations across ERP application, improving page load speed and overall user experience.
- Built data visualization features (JS Chart) to support resource allocation and data-driven decision-making.
- Coordinated with backend engineers to integrate RESTful APIs, improving the scalability of the client's digital infrastructure.

Technology stack: React.js, Redux, TypeScript, JS Chart, Docker, GitLab, HTML5, TailwindCSS.

Dev Information Technology Limited

May 2023 – Aug 2023

Developer | Kolkata, India

- Developed the Marketing and Transport Module (MKTm) to manage sales and transport operations for Cement Corporation of India (CCI), integrated with the broader CCI ERP ecosystem.
- Built robust, reusable Angular components for enterprise applications, improving system stability and reducing bug count.
- Delivered a dynamic, accessible frontend using Angular CLI 14, enhancing user interaction across the application.
- Participated in bi-weekly Scrum ceremonies focused on new feature integration and sprint planning.

Technology stack: Angular, TypeScript, JavaScript, JS Chart, HTML5, Bootstrap, CSS3.

Velocis Systems Pvt Ltd

Developer | Kolkata, India

Jul 2021 – Apr 2023

- Contributed to the Chennai Port Trust (ChPT) Port Operation Management System (POMS), an integrated platform overseeing end-to-end port operations.
- Built internal tools using Java Server Faces (JSF) and PostgreSQL to support operational workflows.
- Developed interactive UI components for client-facing applications, improving usability for operational staff.

KEY ACHIEVEMENTS

- Sole frontend developer responsible for designing and shipping the Payment Module of a Central Government platform, from architecture through production.
- Led a 7-member Angular development team, embedding code-review practices that reduced development time.
- Drove a legacy-to-React.js migration that improved maintainability while sustaining maximum uptime for a live ERP system.
- Delivered measurable performance and load-time improvements across two separate enterprise applications.

EDUCATION

Master in Computer Application	— Vidyasagar University, Medinipur, India	Marks: 75.80%
Bachelor of Computer Application	— JIS College of Engineering, Kalyani, India	DGPA: 7.96 / 10
